CAREER OBJECTIVE

Full Stack Developer (MERN) with hands-on experience building production-grade full-stack applications — including **44+ REST API** endpoints and **23 MongoDB collections** across 3 featured projects — covering authentication, role-based access control, and Stripe payment integration.

TECHNICAL SKILLS

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Framer Motion
- **Backend:** Node.js, Express.js, REST API design, JWT, Better Auth
- **Database:** MongoDB Atlas
- **Tools & Platforms:** Git, GitHub, Vercel, Cloudinary, Stripe, VS Code
- **Other:** Responsive Web Design, Agile collaboration, DSA & problem-solving (LeetCode)

PROJECTS

[Linear.ai — AI-Powered Agile Management](#) | *Next.js, TypeScript, MongoDB, Groq, [Frontend](#), [Backend](#)*

Jul 2026 – Present

1. Developed a full-stack agile project management platform with **2 role-based** dashboards (Admin/Member) across **10 frontend pages**, a Kanban workspace, and AI-driven task intelligence — powered by **7 REST API** endpoints and **4 MongoDB collections**.
- Integrated an AI pipeline (Groq) that takes a task's title and short description as input to auto-generate full task descriptions and relevant tags, returning results in **~2–3 seconds**.
- Built a context-aware AI co-pilot chat assistant that reads a user's complete task list from the live database in real time to deliver accurate, task-related replies to workspace queries.

[Artly — Art Marketplace & Gallery Platform](#) | *React, TypeScript, Express.js, MongoDB, Better Auth, [Frontend](#), [Backend](#)*

Jul 2026 – Present

- Enabled artists to sell online with **3 role-based access** levels (Admin, Artist, User) across **13 frontend pages**, including protected artist routes (registration, listing, dashboard) — backed by **10 API endpoints** and **7 MongoDB collections**, with self-serve onboarding and auto-redirect for unauthenticated users.
- Made original art easy to discover and buy with a searchable, filterable, sortable Explore experience — plus secure cross-domain session auth via Better Auth for reliable production sessions.

[RecipeHub — Recipe Sharing Platform](#) | *Next.js, Express.js, MongoDB, Stripe, Better Auth, [Frontend](#), [Backend](#)*

Jun 2026

- Built a Stripe-based payment system across **18 frontend pages** that lets recipe creators monetize their content — free users capped at 2 recipe uploads, premium users get unlimited uploads via subscription, supported by **27 API endpoints**, **3 role-based access levels**, and **12 MongoDB collections**.
- Solved trust and quality-control gaps in a user-generated platform with a report system for flagging inappropriate content and an admin dashboard to manage users, review reports, and moderate recipes — spanning **3 distinct UI layouts**.
- Made recipe discovery scalable with server-side pagination and category filtering, plus favorites/likes so users can save and revisit dishes they care about.

EDUCATION

M.A., Arabic and Islamic Studies — *Al-haiatul Ulya Lil-jamiatil Qawmia, Dhaka, 2017/18 Session.*

CERTIFICATE & COURSES

Complete Web Development Course With Programming Hero — *Programming Hero, Dhaka*

INTERPERSONAL SKILLS

Content writing, Translation, Teamwork & Collaboration, Fast Learning Ability, Communication, Adaptability, Problem-Solving Attitude

LANGUAGES

English (Elementary Working Proficiency) | Bengali (Native) | Arabic (Limited Working) | Hindi (Elementary)
